- Individual meetings and Small Group Learning/Writing

Learning Centre – Courses Description

Course Title	Efficient time management Overcome procrastination and overwhelm		
Instructor	Ioana Anghel-Pirich		
Course Format	Workshop	Duration	90 minutes/wks
Context	Time management is very important during BA and MA. Often, students procrastinate because they feel overwhelmed by the number of tasks and their complexity. A good time management triggers the creativity and intrinsic motivation of students. Also, it could make a real difference for the academic success.		
Learning Outcomes	By the end of this class students are going to have a deeper understanding on: <ul style="list-style-type: none"> ● why they procrastinate and how to overcome it, with specific tools and methods ● what are the differences between intrinsic and extrinsic motivation; ● How to choose the planner that fits with their personality 		
Contents	<ul style="list-style-type: none"> ☐ What is time-management, as an university student; ☐ Types of time-planners and how to choose the right one; ☐ SMART goals in learning: from theory to reality; ☐ Productivity in learning: triggers, methods, steps; ☐ Simple and applicable ways to take charge of the time. ☐ Exercises to trigger intrinsic motivation ☐ Planners and personality, practical examples on how to plan and what fits to your personality 		
Student's Material and Literature	Handout from the instructor		
Teaching and Training	Presentation, reflective discussions Small group works		
Assessment	n/a		
Course Frequency	Series of workshops with practical implementation		

Course Title	How to learn & revise quickly and efficiently, using metacognition and self-regulated learning		
Instructor	Ioana Anghel-Pirich		
Course Format	Workshop	Duration	90 minutes/per ws
Context	Sometimes, learning and keeping all in balance can be stressful, challenging and time consuming for students. It is well known that there are several psychological techniques which can be applied successfully to increase attention, comprehension and the speed of learning. Usually though, students are not aware of them.		
Learning Outcomes	The aim of this course is to support students efficiently with tools they can apply when preparing for challenging assignments and exams, to study and review more effectively. By the end of this workshop students are going to have a deeper understanding on what are the best methods to learn and review for the exams. They will be able to choose the techniques that fit best to their personality and learning style.		
Contents	<ul style="list-style-type: none"> ☐ Types of learners and best learning strategies for each type (each student will find out the type of learner he/she is); ☐ Why you need a self-evaluation & how to properly do it ☐ What is learning, brain mechanisms activated during the learning process; ☐ How to prepare your mind for learning. How to put your mind in learning mood ☐ Structuring learning material ☐ Techniques for a better understanding and memorization of the learning material, ☐ The most effective revision techniques; 		
Student's Material and Literature	<i>Students have to bring a short material on a topic they find hard to understand and memorize.</i> Handout from the instructor		
Assessment	n/a		
Course Frequency	Series of workshops with practical implementation		

Course Title	Exam anxiety – turn your enemy into a great ally		
Lecturer	Ioana Anghel-Pirich		
Course Format	Workshop	Duration	90 minutes per ws
Context	<p>Fear, in a healthy portion can be beneficial for a short phase since it promotes focus and concentration to tackle a pressing issue at hand. However, for many, such emotions can become habitual (conditioned) due to continuous stress about the future, which is mainly because of their studies and exams. This allows for the stress to maintain a higher level for a longer period (Anxiety), which could become an issue not only for their studies and general health (sleep disorder and somatic pain), but also in their personal and social life.</p>		
Learning Outcomes	<p>This workshop offers a clear understanding of anxiety and its origin. Participants will then be trained in these skills, followed by appropriate tools and techniques to sustain their emotional wellbeing in times of stress and mainly during exams. Cases and examples will be discussed to shed a better light on specifics of anxiety and alternative ways to unlearn the old thought patterns replacing them with new and practical ones that are more empowering.</p>		
Contents	<ul style="list-style-type: none"> ☐ Fear (understanding its origin, pros & cons) ☐ Anxiety (difference to fear, phases of stress, how it is created and its symptoms in Physical, Psychological and Emotional context) ☐ Anxiety and its 'partners in crime' (rarely comes alone) ☐ How conditioning works (creation of beliefs and conditioning) ☐ Experience of events that lead to beliefs ☐ The <i>inner</i> and the <i>external</i> world explained (subjective perspective, schemas, and paradigms) ☐ Practical exercises (breathing, reality check, stop the rumination) etc
